

App Ideas to Enhance Learning

Dolink Green Screen (iOS only) **(Paid App)**

A technique once only available to professionals is now possible in your school using very cheap materials. Use a green screen app like **Dolink Green Screen** to create your own Jurassic picture or video.

You could use the pictures we have provided or find your own images or why not even get your children to make their own background by taking photos of their work and talking about it. For more information on how to use green screen see [here](#).

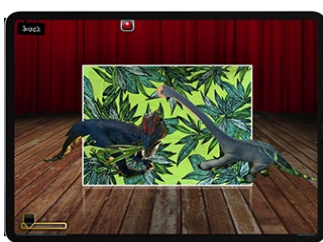

ChatterPix (Android/iOS)

Simply take any photograph, draw a line to make a mouth, and record your voice.

You can use this simple tool to make your small world come to life or to put words into the mouth of the main character of your story.

Create your own dinosaur images, 3D model and make them come alive with just one line.

Puppet Pals (iOS only) **(Paid App)**

Puppet Pals HD Director's Pass is an easy to use cartoon creator app that allows you to create your own animations using a variety of in-built themes and characters or you can import in your own images, make your toy dinosaurs come to life or retell a dinosaur book/story.

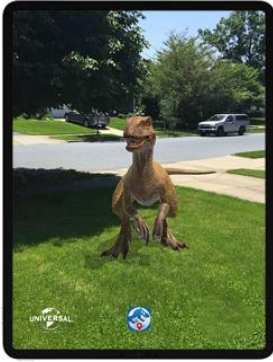

FxGuru (Android/iOS only) **(Offers in-app purchases)**

Add the fun and excitement of big-budget Hollywood special effects to any video with FxGuru.

Use this app to create your own AR dinosaur experience within your class.

Warning: some of the images within FXGuru are very graphic and not suitable for young children, only use this app to create a video do not allow children to access to independently.

DINOSAURS

Jurassic World Alive (Android/iOS) (Contains ads·Offers in-app purchases)

Bring dinosaurs to life in Jurassic World Alive! Dinosaurs have returned to rule the Earth, and they're roaming free in your world. Explore your surrounding area and take photos.

DoodleLens (iOS only)

DoodleLens turns your flat drawings into interactive, animated 3D AR characters, scenes, and stories!

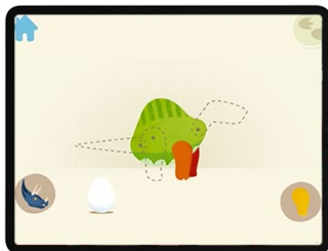

Scan a line drawing in and place it in the world around you.

iPad Markup (iOS only)

Finding Image Markup in Photos

1. Open the Photos app.
2. Find the image you want to edit and tap on it.
3. Tap the editing slider button.
4. While in editing mode, tap the button that looks like an ellipsis within a circle, tap "Markup" from the popup menu.
5. Draw over a pre loaded dinosaur image to design your own dinosaur skin.

Dinosaur Mix (Android/iOS) (Paid App)

Create your own dinosaur! Mix and swap body parts then see it come to life. Explore the world, let out a roar and find eggs to change your dinosaur's appearance.

Mix up the body, head, tail and legs from a Tyrannosaurus, Spinosaurus, Triceratops, Stegosaurus and Brachiosaurus into many combinations.
