

Using j2e Toolsuite with Dinosaurs:

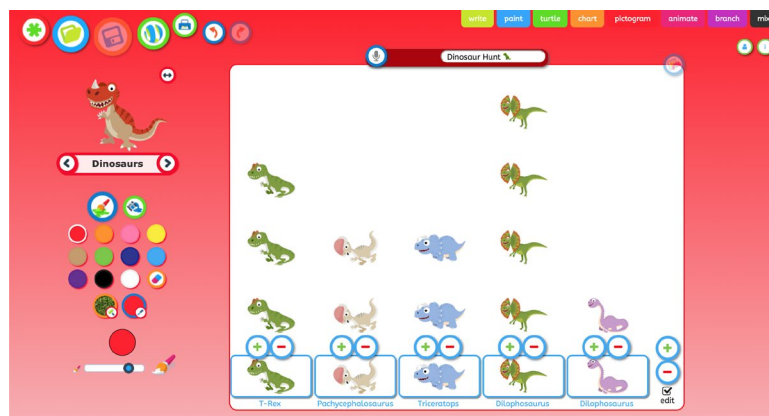

Vote and Graph using jit5 within “Favourite Dinosaur” graph:

Have the children vote for their favourite dinosaur and graph the results using j2e Pictogram:-
Which dinosaur do most children like the best?

Vote and Graph with Dinosaur Hunt:

Print out a section dinosaur images from the dinosaur clipart bank (simply right-click on an image and open in a new window and then save/print) place in your outside area and ask children to hunt out all of the images with a simple tally chart. Once all of the children have completed the tally chart, as a class plot the data using [JIT Infant Toolkit](#) “Pictogram”

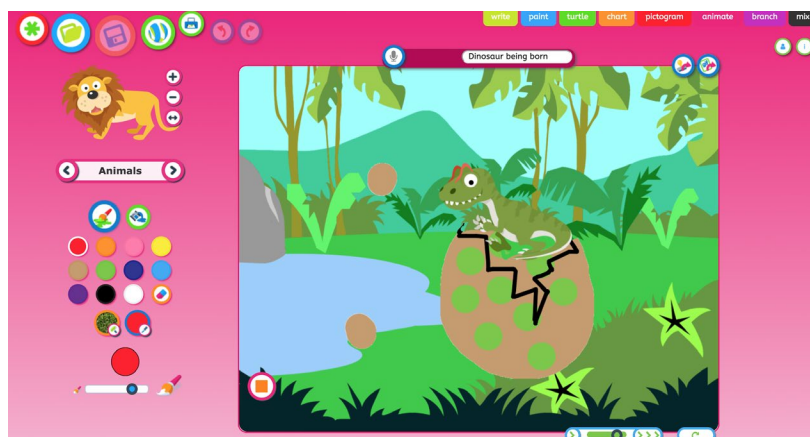

Make your own Dinosaur Fact Book with jit5 Mix:

Combine the tools within jit5 to make a fact book about dinosaurs.

Make your own dinosaur animation:

Use animate within jit5 to create a simple animation including facts about dinosaurs.

Sorting dinosaurs/animals with branch:

Add a mixture of animals and dinosaurs into branch. With your students, see if you can sort them (you may want to describe each thing as you go giving strong scaffolding).

write point turtle chart pictogram animate branch mix
